

## **follows ... New Products**

### **A new generation of Trailers for A6 Monitors**

The growing request for mobile high capacity monitors has led Caccialanza to develop a new family of trailers.

These trailers have a fully new and innovating design which allows fast and secure operation with A6 monitor with a flowrate up to 8.000 lt/min.

In addition to the traditional manual operated solution, Caccialanza presents a fully remote controlled version, complete of power unit, electrical actuated monitor, electric flow control valve, traditional wired remote control and wireless remote control.

The trailer is manufactured according to international standards and can be allowed to travel on roads.

### **Standard Panels for Remote cControlled Monitors**

The well known Caccialanza panels for remote controlled monitors have finished all the reengineering operations and are already supplied.

A wide range of standard panels with modular features can meet any requirement of monitor remote control, from one or more locations.

All the panels of the new line are equipped with programmable logical devices and can be used for any Caccialanza remote controlled monitor model.
