

Branch pipe Mobile Foam Units

Mobile Foam Unit CA 200/LM type

- equipped with Z2 inline premixer and LM 200 branch pipe
- equipped with Z4 inline premixer and LM 400 branch pipe

Caccialanza & C. reserves the right to change or modify without previous notice any data or specification due to changes or modification in order to improve the products presented.

Branch pipe Mobile Foam Units

Mobile Foam Unit CA 200/LM 200 type

The Mobile Foam Unit CA 200/LM 200 type is constituted by:

- trailer in welded carbon steel pipe with fixing supports for the application of the foam compound drum, of the inline foam premixer and of the portable foam maker, with 2 container for the 2 fire hoses, with 2 rubber wheels and towing eye for towing inside an industrial area, with box for containing of couplings wrenches and other tools,
- foam compound drum in carbon steel with capacity 200 lt. (without foam compound),
- self-priming inline premixer Z 2 type,
(to be used combined with the on board medium expansion foam making branch pipe LM 200 type or equivalent),
 - premix flow rate 200 lt./min,
 - working pressure range 5÷12 bar,
 - pressure loss ca. 2,5 bar,
 - max. suctioning height ca. 3 m.,
 - body in brass/carbon steel pipe,
 - ejector nozzle in brass,
 - diffuser cone (improved) polyethylene,
 - foam compound inlet nipple with calibrated orifice for admixing percentage 6% (or 3%) and non-return valve,
 - complete with 2,5 m. flexible suctioning pipe and dip pipe,
 - inlet and outlet couplings BS 2½" in brass
 - external protective painting: sandblasting SA 2,5, epoxy primer coat d.f.t. 40μ, 2 final polyurethane coat red RAL 3000, d.f.t. 30μ each, total d.f.t. 100μ
- portable medium expansion foam branch pipe LM 200 type (to be used with Z 2 type self priming inline premixer),
 - premix flow rate 200 lt./min at 5 bar,
 - expansion rate ca. 1÷80,
 - foam flow rate 16 m³/min. with 3% synthetic and AFFF foam compound,
 - inlet nipple and support frame in stainless steel AISI 304, body stainless steel plate AISI 304, internal sieve stainless steel AISI 304, spray nozzle brass, support handle in stainless steel AISI 304,
 - inlet coupling BS 2½" inst. male in brass
 - range of jet about 5 m. at nominal flow rate,
 - natural finish,

- 2 fire hoses Ø 2½", length 20 m., SS P40 type,
min. bursting pressure 40 bar,
with circular woven jacket 100% polyester,
external polyurethane protective cover, red color,
internal lining synthetic rubber,
complete with BS 2½" couplings in brass
(alt. STORZ B 75 couplings in light alloy, UNI 70 couplings in brass or other couplings
according to different National Standards on request),

Type	Code nr.	Flow rate at 5 bar (lt./min.)	Type of Couplings	Weight (Kg)	Dwg. nr.
CA 200/LM200	2322026220	200	BS 2½"	90	52050062
CA 200/LM200	2322021220	200	UNI 70	90	52050062
